

PLAYGROUND SAFETY

Source: <http://www.aap.org/family/playgrd.htm>

- The playground should have safety-tested mats or loose-fill materials (shredded rubber, sand, wood chips, or bark) maintained to a depth of at least 9 inches. The protective surface should be installed at least 6 feet (more for swings and slides) in all directions from the equipment.
- Equipment should be carefully maintained. Open "s" hooks or protruding bolt ends can be hazardous.
- Swing seats should be made of soft materials such as rubber, plastic or canvas.
- Make sure children cannot reach any moving parts that might pinch or trap any body part.
- Never attach-or allow children to attach-ropes, jump ropes, leashes, or similar items to play equipment; children can strangle on these.
- Make sure metal slides are cool to prevent children's legs from getting burned.
- Parents should never purchase a home trampoline or allow children to use home trampolines.
- Parents should supervise children on play equipment to make sure they are safe.
